Work

Software Engineer, Rooster Grin Media

January 2019 - March 2020
- Maintained and added features to appointment scheduling and reminders applications for orthodontists build with React and Ruby on Rails and deployed on AWS
- Successfully met launch deadlines for two new online scheduling products
- Managed relationships with business partners to ensure the successful development and release of bug fixes, new features, and RESTful API integrations
- Onboarded and supervised two new engineers to the team, including providing code reviews, leading trainings, and managing product timelines

Web Developer, Rooster Grin Media

January 2018 - January 2019
- Worked with technologies such as Vue, Pug, Sass, and Wordpress to build, launch and maintain client websites
- Collaborated closely with 400+ small business clients to improve their web presence

Account Manager, NerdWallet

January 2016 - April 2017
- Managed a partner base of 200+ banks and credit unions to troubleshoot and solve problems as they arose to maximize their content marketing strategies

Sales Development Representative, NerdWallet

September 2014 - December 2015
- Coordinated with multiple internal business leaders to test out the product market fit of NerdWallet's first ever business to business offering

Sales Development Representative, Oracle, *July 2013 - August 2014*

Education

University of California, Berkeley 2013

Bachelor of Arts, Psychology

General Assembly, San Francisco 2017

Web Development Immersive

Projects

Dayta
An app for keeping track of any day to day events and activities you might want to monitor. Built using react hooks for a front end, Cloud Firestore as a backend and hosted with Firebase.
