- JavaScript - React - Ruby on Rails - HTML - CSS - AWS - Firebase - GitHub - PostgreSQL -

Education

University of California, Berkeley 2013
- Bachelor of Arts, Psychology

General Assembly, San Francisco 2017
- Web Development Immersive

Work

Software Engineer, Rooster Grin Media
January 2019 - March 2020
- Supported Rooster Grin's appointment scheduling and reminder applications from end to end build with React and Ruby on Rails and deployed with AWS
- Launched two new products for existing and new patient online scheduling
- Managed relationships with business partners to ensure the successful development and release of bug fixes, new features, and integrations
- Onboarded and supervised new engineers to the team, including providing code reviews, leading trainings, and managing product timelines

Web Developer, Rooster Grin Media
January 2018 - January 2019
- Worked with technologies such as Vue, Pug, Sass, and Wordpress to build, launch and maintain client websites
- Collaborated closely with 400+ small business clients to improve their web presence

Account Manager, NerdWallet
January 2016 - April 2017
- Managed a partner base of 200+ banks and credit unions to troubleshoot and solve problems as they arose to maximize their content marketing strategies

Sales Development Representative, NerdWallet
September 2014 - December 2015
- Coordinated with multiple internal business leaders to test out the product market fit of NerdWallet's first ever business to business offering

Sales Development Representative, Oracle: July 2013 - August 2014

Projects

Dayta
An app for keeping track of any day to day events and activities you might want to monitor. Built using react hooks for a front end, Cloud Firestore as a backend and hosted with Firebase.
